Graphic Design

Technical skills

HTML, CSS, Sass, JavaScript, JQuery, Adobe Photoshop and Adobe Illustrator

Work Experience

Red 6 Nails

April 2013 - May 2016

Owner / Manager

After many years of experience in beauty industry, I and my 2 sisters opened the door for our own beauty salon in 2013. With the responsibility as owner and manager, I was in charge of our salon's social media marketing. I managed Facebook, Twitter, Pinterest, Tumblr and Twitter accounts to promote company's products and services. Designed, created and managed web based ad campaigns with generated direct emails.

Problem

For over two years of having a website of misplaced information and not a well-designed website, my client asked me to give her website a facelift. I used only the contents of their current website and created whole new hand-coded website.

I looked at the issues that my client and their users were facing and identified the issues as:

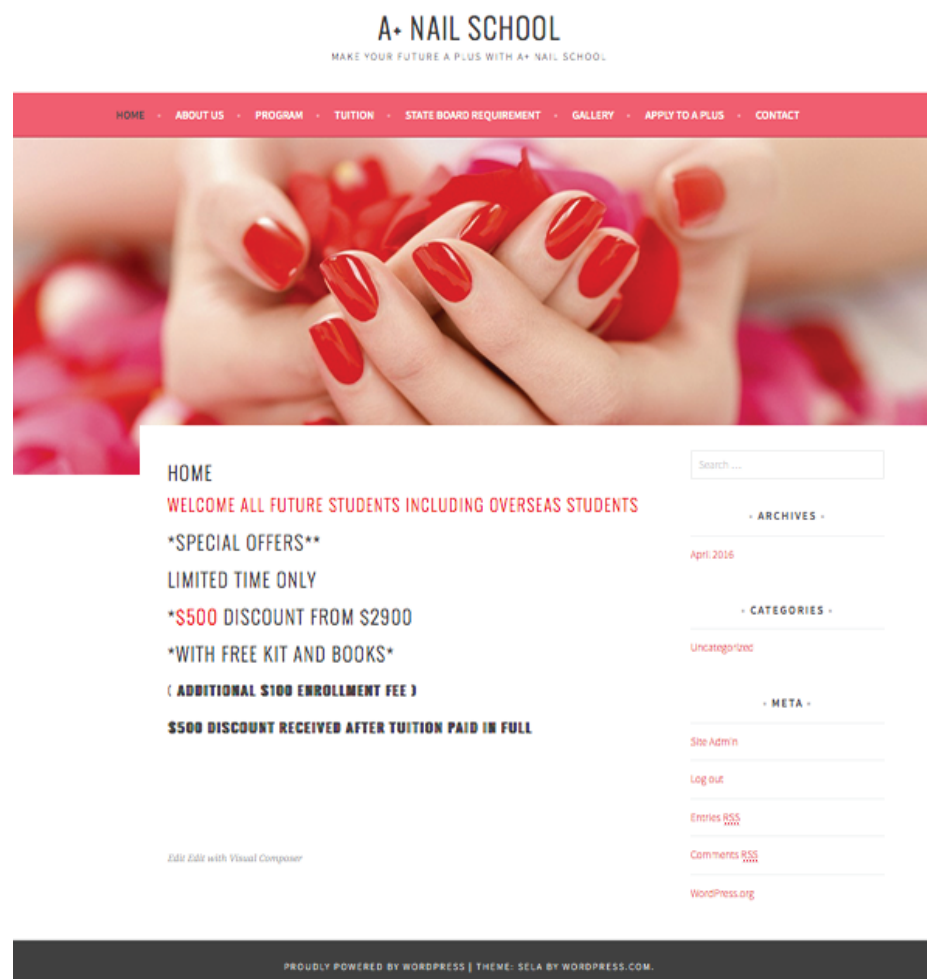

1. Misplaced and unnecessary contents
2. The navigations are confusing
3. Email form doesn't work properly

Solution

While the whole website got a refresh, the changes are most clear in the navigation bar and the contents of every page.

You can see that navigation bar was simple easy to understand but the content in them were scattered through different pages.

Case Study: A+ Nail School

After lots of reading and doing some research I puzzled together all the related information and group them so users can easily find all the information they need in one place.

After

Challenge

I challenged myself to apply my new knowledge of SASS in real projects.
